To Bee or Not to Bee: How can the life span of leaf-cutter bees be extended?

Challenge: Environment

Category: Junior

Region: Parkland

City: Foam Lake, SK

School: Foam Lake Composite High School

Abstract: Death of alfalfa leaf cutter bees is a major issue for bee farmers. Adult bees are sometimes unable to leave the hut due to weather conditions and then can not find food. Alfalfa sprouts proved to be the most natural and effective supplement for keeping the bees alive in the hut following incubation.

Biography

Garrison Fox goes to school at Foam Lake Composite School. He lives on a farm near Foam Lake, Sk with his mom, dad, and three sisters. He is in grade 7 and is 12 years old. His favourite sport is curling and his favorite subject is math. This is his first time at CWSF and he really enjoys Science Fair.
