Lose a Tonne: It's Easy!

Division: Earth & Environmental Sciences

Category: Intermediate

Region: Cariboo Mainline

City: 150 Mile House, BC

School: Williams Lake Secondary

Abstract: My study focused on the One Tonne Challenge. I completed the questionnaire according to what would be closest to an average household. I then did the reductions and compared each change with the starting emissions in graphs. I also looked into the background of the questions and any assumptions that were made.
