

CWSF 2011 - Toronto, Ontario

Stephen Stechishen

Birth Order, Personality: Are They Connected?

Challenge: Health

Category: Junior

Region: Sunset Country

City: Red Lake, ON

School: Red Lake Madsen P.S.

Abstract: This study was to see if there are trends relating personality traits to someone's birth order. To conduct this experiment a survey was used. In my mind it was thought that there would be no trends seen in the survey results. In the end the results made me believe that there are trends in personality traits linked to birth order.

Biography

Born in Red Lake, Ontario I have gone to Red Lake Madsen Public School all my life. I have always done quite well in speeches and reasonably well in science fair but this is the first time I have made it to the CWSF. Other than that I have always enjoyed watching a good game of curling if not playing it, in fact next year I hope to curl 4 days a week. Even more so I have always been involved in many school activities ranging from sports such as volleyball to even my school council. I also enjoy music. Coming from Red Lake you don't get the chance to do many things so this past year I took scuba diving lessons and currently I'm a junior advanced scuba diver. I don't know what I would like to do for a career but I would like to go to the University of Guelph because I hear they have some of the best food in universities.
