Griffin Smeenck

Isn't That Slick...

Challenge: Environment

Category: Junior

Region: Chatham-Kent

City: Thamesville, ON

School: Thamesville Area Central E.S.

Abstract: This project looked at an environmentally friendly way of cleaning up an oil spill. Environmentally friendly sorbents were used to see how effectively they cleaned up a replicated oil spill. The project also looked at whether the sorbents could be discarded safely, and used to make energy after cleaning the oil spill.

Biography

My name is Griffin Smeenck. I am 14 years old and have participated in the Chatham-Kent science fair since grade five. I like science, especially things like human anatomy, I am hoping to become a doctor when I finish my schooling. I love the Harry Potter books and movies. I play volleyball for my school team and am part of the student council. I like to travel, and recently went on a trip through Spain, Portugal and Morocco. Yellow is my favorite colour.
