Lauren Laturnus

Electronic Pollution

Challenge: Health

Category: Junior

Region: South Fraser

City: Delta, BC

School: Devon Gardens Elementary

Abstract: My project was to find out which modern electronic device has the greatest impact on the growth and health of a bean plant. 6 bean plants were placed beside five different devices: a cell phone, a TV, a microwave, a computer and a radio. One plant was kept away from any device as a control. The plant beside the TV was damaged the most.

Biography

Lauren is a grade seven French Immersion student in Delta, B.C. She is an active participant on the school volleyball, basketball and track & field teams. Outside of school, her soccer team just won the provincial championships and she is now enrolled in the spring ball hockey season. She is an avid reader and a fan of the Pittsburgh Penguins.
