

CWSF 2011 - Toronto, Ontario

Tyler Tardi

Go Green with R.E.D. (Rain Energy Device)

Challenge: Energy

Category: Junior

Region: South Fraser

City: Surrey, BC

School: Sunrise Ridge Elementary

Abstract: This project determines if it is possible to harness rain energy by directing it onto a water wheel through a drain pipe. Results showed that small amounts of energy were generated using the R.E.D.. With further optimization, this innovation may help offset the cost of having to buy electricity or could be used to run mechanical things during peak hours of electricity use.

Biography

My name is Tyler Tardi and I am a grade 7 student at Sunrise Ridge Elementary School in Cloverdale, BC. My favourite subjects in school are math, science and French. My hobbies are participating in school sports, solving all types of Rubik's cubes, playing chess and curling. I curl in a competitive league and hope to represent BC and maybe even Canada one day. In the future, I plan to be an electrical engineer. I have an older brother named Jordan and we love building random stuff in our garage. We both love to invent new things or improve existing things. My garage is always under construction. After my brother went to the CWSF in 2009 in Winnipeg, I thought this was something I would like to try to do as well. I am so excited and honoured to be representing BC at the 50th CWSF in Toronto.

Awards

Value

Excellence Award - Junior - Silver Medal Sponsor: Youth Science Canada	\$700
The University of Western Ontario Scholarship Silver Medallist - \$2000 Entrance Scholarship Sponsor: University of Western Ontario	\$2 000
Total	\$2 700
