Abstract: To determine public opinions on cloning I did research on cloning and a survey. The majority of participants believed that cloning in research was ok but they would rather eat normal beef instead of cloned beef. The public wanted cloned food to be labelled and lots did not want to eat cloned products but 80% would use a cloned organ to save their life.

Biography

My name is Laura Stothers Dawson. My personal hobbies include piano, scrapbooking, science and drawing. I like to rollerblade, bicycle, swim and play tennis. At school my favourite subjects are language arts and science. My future career plan is to be a fantastic science teacher.
