Kaitlyn Bulmer

Colour of Plants

Challenge: Environment

Category: Intermediate

Region: Peterborough

City: Peterborough, ON

School: Kenner C.V.I.

Abstract: My project was set on determining whether plants watered with coloured water can have their stems change colour. This was determined by watering 16 plants with coloured water and watching for change.

Biography

My name is Kaitlyn Bulmer. I am a grade 9 student at Kenner Collegiate in Peterborough Ontario. I previously attended Westmount public school for the gifted program and chose to attend Kenner for the I.B Program. I am currently on a lacrosse team and spend a lot of my spare time reading, baking and babysitting. Future plans I have include going to University in the Medical field to become a specialized doctor such as a pediatrician or dermatologist. I also am interested in the environment and even though I don't see myself in a career with that, I try to show integrity towards our earth! I set many personal goals and strive to be the best I can possibly be.
