

Biographie

I love science! Taking everything apart, and putting it back together in a new way is my way of learning how things work and how to improve a design. Last year, I received a Magna Cum Laude Award in the Canada Wide Virtual Science Fair. This year, my First Lego League team will be traveling to the World Lego Robotics Championships in St Louis. Last year, I had the honour of serving as a Legislative Page at Queen's Park. When I am not conducting science experiments, I can be found at the pool training to be a lifeguard, or at Air Cadets advancing through the ranks.

Anthony Meola

Let it Snow, Let it Snow, Let it Snow
