Project Feeder Watch

Division: Life Sciences

Category: Junior

Region: Strait

City: Guysborough, NS

School: Chedabucto Education Centre / Guysborough Academy

Abstract: What do birds like to eat and where do they like to eat it? I kept a log for a period of sixty-eight days and found that birds at my site preferred to feed on the ground, their favorite food was cracked corn, and the most common bird at my Feeder Watch Site was the dove.
