

CWSF 2011 - Toronto, Ontario

Carly Redford

The Social Obsession

Challenge: Information

Category: Senior

Region: Cariboo Mainline

City: Lac la Hache, BC

School: Peter Skene Ogden Secondary

Abstract: Growing up in a society that is dependent on technology has allowed me to discover how much it has impacted relationships between people everyday. This led me to study the influence of technology in face to face communication through research and survey. I sent out a survey throughout my school to determine how my peers rely on resources like cell phones and Facebook.

Biography

My name is Carly Redford, and I am currently in grade 10. I would classify myself as confident, outgoing, likeable and social. The most important things in my life right now are my friends, my ambitions, my family, and most of all my future. I like to offer a volunteering hand where ever necessary (the local racetrack, community events, school events), and I'm quite well known for entering competitions (ex. CWSF, DI, etc.). My most current projects going on right now are Science Fair, and I have just been invited to attend a conference for antidiscrimination to better my community. My hobbies/interests are basic. I enjoy music (band, guitar, sound engineering), socializing (whether with friends or people I don't know), and traveling (I believe traveling places creates a unique character and the more places one goes, the more dynamic they may become). My intended career right now is Sound Engineering at the Los Angeles Recording School in the summer of 2011. I would like to take this as an opportunity to possibly open doors for a career in sound engineering, or music therapy. My most important achievement is going to CWSF in 2007 & 2009, and I am proud!
