

CWSF 2012 - Charlottetown, Prince Edward Island

Dawson Heggstad, Harlan Wutzke

Clean-All

Challenge: Environment

Category: Intermediate

Region: Saskatoon

City: Dalmeny, SK

School: Dalmany High School

Abstract: A single litre of oil contaminates a million litres of water. Essentially the re-use of our natural resources must be promoted and processes developed to lead people in an environmentally friendly direction. The ability to reuse absorb-all and recycle the products absorbed will lead small business in the right direction, save our resources by recycling, and reduce the abundance of waste in our landfills.

Biographies

Dawson - Dawson Heggstad is 13 years old he is involved in volleyball, basketball, track and field, hockey and ball hockey. In his spare time he likes to invent cool stuff, hang with friends and snowboard. When he grows up he would like to be a professional snowboarder or an engineer.

Harlan - My name is Harlan Wutzke and I am a grade nine student from Dalmeny, Saskatchewan. I am interested in many sports (hockey, soccer, track and volleyball), and I enjoy hanging out with my friends and watching movies. I work as a minor hockey referee as well as for my father on weekends at Saskatoon Truck Parts. Regarding post secondary education, my main interests are engineering and business entrepreneurship. Our project started with our fathers' discussion regarding the high cost to dispose of a product they both use, Absorb-All. Our goal was to find a way to reduce their costs by recycling the product. However, it was equally important for us...

Awards
