The Mathematical Perception: A Unified Theory

Division: Life Sciences

Category: Senior
Region: Toronto
City: Toronto, ON

School: Marc Garneau Collegiate Institute

Abstract: When presented with a set, the mind is able to analyze it quantitatively and

assign a value. Variables affecting the ability to perceive cardinality (the total of a set) are explored using a series of experiments. A unified theory explaining the process of mathematical perception is formulated from

statistical analysis.

Awards	Value
Canadian Psychological Association Award - Senior	\$300
Sponsor: Canadian Psychological Association	
UBC Science (Vancouver) Entrance Award	\$2 000
Senior Silver Medallist - \$2000 Entrance Scholarship	
Sponsor: The University of British Columbia (Vancouver)	
The University of Western Ontario Scholarship	\$1 500
Silver Medallist - \$1500 Entrance Scholarship	
Sponsor: University of Western Ontario	
Silver Medal - Life Sciences - Senior	\$700
Sponsor: Pfizer Canada	
Total	\$4 500
