Mikaela Cockney-MacNeil

Are You Sure?

Challenge: Health

Category: Intermediate

Region: Beaufort-Delta

City: Inuvik, NT

School: Samuel Hearne Secondary School

Abstract: People are susceptible to social informative conformity. I tested to see if males or females were more susceptible to this effect. Participants of both genders between 12-17 were randomly selected to partake in a two-day test. The test results showed all participants did 'second guess' themselves to some degree, in both episodic and semantic memory. It was much greater in males.

Biography

Hello, my name is Mikaela Cockney-MacNeil, and I was born and raised in Inuvik, Northwest Territories. I like to figure skate and bake in my spare time. I am also very interested in psychology and sociology.
