#### Efficacy of Eye Drops on Keratoconjunctivitis Sicca After Swimming

**Division:** Health Sciences

**Category:** Junior

**Region:** Toronto

**City:** Toronto, ON

**School:** University of Toronto Schools

**Abstract:** Thirteen participants, who swam a minimum of three widths of a chlorinated pool, were tested for a reduction in three keratoconjunctivitis sicca (kc) symptoms after eye drop use. The results indicated that 85.6% of the participants had a reduction in kc after swimming in a chlorinated pool.
