

CWSF 2012 - Charlottetown, Prince Edward Island

Katelyn Verdonk

Go with the Flow

Challenge: Environment

Category: Junior

Region: Fraser Valley

City: Abbotsford, BC

School: Barrowtown Elementary

Abstract: I chose to do this project to investigate how many salmon live in 4 water sources I chose to experiment with. The traps were set up at a ditch by Barrowtown Elementary, in a ditch by a field on my farm on No. 3 Road, in the Sumas Canal and at an irrigation shed leading into the Sumas Canal.

Biography

My name is Katelyn Verdonk. I'm 12 years old and I'm in Grade 7 at Barrowtown Elementary. I live on a dairy farm in the Fraser Valley, British Columbia. I am very concerned about the environment and the survival of many things on the planet. Last year I did a project called 'Salmon Survival: Is Something Fishy?' This year I decided to take a step further in this area of study and chose to study the rivers, streams and waterways that salmon are or might be found in.
