Siobhan Bligh

Umahiqi: A Study of Stroke in Nunavut

Challenge: Health

Category: Intermediate

Region: Kitikmeot

City: Cambridge Bay, NU

School: Kiiliniq H.S.

Abstract: My study was about strokes and why they are more common in Nunavut then in the rest of Canada. Also looking at what are some of the risk factors that might cause strokes in Nunavut.

Biography

Hi my name is Siobhan Bligh and i have lived in Cambridge Bay, Nunavut for 14 years. i got the inspiration when someone in the community died of a stroke and one of the elders of the town told me she has seen more stroke in the arctic then heart attacks. I plan to investigate this further by finding statistics and by personal experience. My advice to other students is not to wait for the last day to finish, finish early and you will feel alot better.
