I Put That...On Everything!

Challenge: Discovery

Category: Junior

Region: Parkland

City: Foam Lake, SK

School: Foam Lake Composite High School

Abstract: This project compares the benefits of using Cattle manure vs. Swine manure as fertilizer. Both types of manure are rich in nutrients such as nitrogen, potassium, and phosphorous. These nutrients are needed for plant growth and production. Using manure as fertilizer is beneficial, but which type of manure is better?

Biography

I live on a farm in Saskatchewan. I am in dance, 4-H, volleyball, and basketball. Our farm is a mixed farming operation with about 80 cows, a few pigs and grows mixed crops. While picking a science fair project you should think about things that interest you, and you know or can get information on easily. Also that science fair is hard work but if you work hard it can pay off!
