

CWSF 2012 - Charlottetown, Prince Edward Island

Kelcie Miller-Anderson

Mycoremediation of the Oil Sands

Challenge: Resources

Category: Senior

Region: Calgary Youth

City: Calgary, AB

School: Bishop Carroll High School

Abstract: Currently tailings ponds cover 170km² in Alberta, but an effective method of treatment has not yet been established. This project aimed to create a novel remediation method with the potential to treat both mature fine tailings and tailings water. Oyster Fungi was applied to both tailings water and mature fine tailings and its ability to remediate hydrocarbons, naphthenic acids, pH and salt concentrations was assessed.

Biography

My name is Kelcie Miller-Anderson and I'm currently a Grade 12 student at Bishop Carroll High School. This will be my fourth year participating at the CWSF and I am really looking forward to visiting PEI for my first time. This past summer I had the opportunity to volunteer in Spain with youth from around the world to be part of an English immersion for Spanish youth to help them develop their conversational English. Next year I plan on taking environmental sciences majoring in land reclamation.
