

CWSF 2013 - Lethbridge, Alberta

Madalon Burnett

Frost Buster

Challenge: Innovation

Category: Senior

Region: East Kootenay

City: Fernie, BC

School: The Fernie Academy

Abstract: This project creates an easy method to eliminate frost build up on the windshield of vehicles. The silicon cover that was produced is easy to put on the vehicle, and stops frost from forming overnight, allowing users to save time in the morning, and reduce idling time on the engine. It also prevents people from driving with limited vision due to frost on the windshield.

Biography

I am a grade ten student. I play two instruments (piano and cello), swim competitively and tap dance. In my free time, I like to ski, and if there's more time, ski. I work at our local swimming pool as a slide attendant, and have taken my bronze cross. I live in eastern BC near the Alberta border near a ski hill in the Rocky Mountains. I live on a gorgeous tree farm with my parents. My favourite subject is math because I have an amazing math teacher. Recently I went on a unforgettable trip to Peru where I worked for two weeks at a school for street boys and a week touring Cusco and Machu Picchu. It was an amazing experience. I'm super excited to be coming to CWSF 2011 and I can't wait.
