

CWSF 2013 - Lethbridge, Alberta

Elizabeth Maciborsky

Eyes, Ears and Memories

Challenge: Health

Category: Intermediate

Region: Central Alberta

City: Penhold, AB

School: Innisfail Junior Senior High School

Abstract: I was testing to see which memory, visual or auditory, was more common and if gender had any affect on it. After 24 tests, I determined that visual memory is more common and gender has no affect on memory.

Biography

I'm Elizabeth I go to school in Innisfail and participate in many sports and various activities. After I finish school, I want to go to University to get a degree in architecture. I decided to do my project because it's important people to know how they learn. If I were to do any further investigations I would test to see if the length of waiting time had any affect on memory. When you're deciding on what project you want to do, I would suggest doing something that has importance to you and that you really think would be interesting.
