An Educated Guess?

Division: Health Sciences

Category: Junior

Region: Avon Maitland-Huron Perth

City: Dashwood, ON

School: St. Boniface Catholic School

Abstract: The purpose of this study was to examine the accuracy of multiple-choice testing used in assessing students. A test was developed for 164 Grade Six/Seven students whereby each student rated their level of confidence on each question. The results were tabulated into four databases to demonstrate the inaccuracy of these tests.
