Abstract: For years, women have struggled and undergone a vigorous trial and error process to find hair products that work for them. All the while, neglecting the chemical makeup of each product they are using. Are we missing something? Is there a potential danger in come hair products that is being overlooked?

Biography

My name is Aysha Draves. I am a second year grade 12 student at Widdifield Secondary School in North Bay, Ontario. I will be finishing high school having earned, not only my Ontario Secondary School Diploma, but I will also be receiving my Nipissing Arts certificate with a major in dance, my Specialist High Skills Major certificate in health and wellness and my Extended French certificate. I have been a part of teams such as basketball, track and field and the dance team throughout my years in high school. I've maintained a part time job for the last three years as well at a local restaurant, which has kept me very busy. I have also done my fair share of volunteer work with organizations like the Santa Fund and the Kinsmen Club. I attended the Ontario Educational Leadership Center in my grade 10 year which was eye opening. Recently, I had the opportunity to do a co-op placement at a local funeral home, which was by far one of the most interesting things I've ever done. I am planning on attending Laurentian University in September, where I will be participating in their Forensic Science program.
