The Cooling Effect of Solid CO2

Division:	Physical & Mathematical Sciences
Category:	Junior
Region:	Central Okanagan
City:	Kelowna, BC
School:	Dr. Knox Middle
Abstract:	Solid C02 (dry ice) has an extreme cooling effect on many different substances. This project focuses on 2% milk, H20, bleach, gasoline, and motor oil's resistance to this effect. Twenty-five trials were performed on each liquid, and the results were carefully recorded and entered into a computer for analysis.
