Brittany Paulick

Est-ce que la couleur de vos yeux affecte la vision dans la noirceur?

Challenge: Discovery

Category: Junior

Region: Tri-County

City: Tusket, NS

School: Maple Grove Education Centre

Abstract: Mon projet pour la foire de science est appelée: Est-ce que la couleur de vos yeux affecte votre vision dans la noirceur? Dans ce projet, je vais mettre 5 personnes (pour chaque couleur d'yeux) dans un chambre noire, et les personnes doivent me dire couleur d'un carte coloré.

Biography

Hello, my name is Brittany Paulick, a grade 8 student at Maple Grove education centre. My activities include: Swimming, taekwon-do, horseback riding and track. My hobby is horseback riding, but it is also a little bit of doodling. I have had a few awards before, two from a French speech contest last year, and one from the MLA of our town for raising money towards Japan, after the tsunami. The inspiration for my project is actually pretty neat. One of my friends was looking up ideas, and she didn't want the idea 'la couleur des yeux.' So, I asked her if she was using the idea. When she said no, I decided to do this as a project as I have some previous knowledge of the subject. Plans for further investigations would be to re-do the same test, but in a lab, with more people on a bigger scale. For any other students who might think of doing this project, I suggest that you do tons of research before starting! As: 'what colors are easiest to see in the dark?' Or research a lot on the three eye colors.
