

CWSF 2013 - Lethbridge, Alberta

Gavin Kerr, Neil Kelley

Medicines from Sea Squirts

Challenge: Resources

Category: Junior

Region: Prince Edward Island

City: Charlottetown, PE

School: Queen Charlotte Intermediate School

Abstract: The goal of this project is to test our hypothesis that natural products from tunicates have antibiotic or antifungal activity. To test this hypothesis we dried, extracted, fractionated and tested tunicate extracts, using the disk diffusion assay, to see if they would kill two types of bacteria and one fungus. We found that one tunicate, *Ciona intestinalis*, selectively killed *Bacillus subtilis*, a Gram positive bacterium.

Biographies

Gavin - Extra Curricular activities include: PEI Alpine Ski Team, School Volleyball and Basketball Teams, PEI Fencing Team, Clarinet and Guitar. Hobbies and Interests: water sports including sailing, water skiing and wake boarding. Awards received: PEI Provincial Science Fair 2012 (Grade 6) award and 3 specialty prizes.
