Challenge: Discovery

Category: Intermediate

Region: Prince Albert & Northeast Saskatchewan

City: Kinistino, SK

School: Kinistino School

Abstract: My science project was a science test consisting of grade 7,8 and 9. I asked 13 adults and 13 grade 10 kids to do my test and see who would do better on my test. The results were that the adults did better than the grade 10 kids.

Biography

I Braydon Humphreys and I am a 16 year old from small town Kinistino Saskatchewan. I am involved in school activities such as basketball, volleyball, badminton, drama, and also band. Science was my inspiration for my project. I plan to do another test to see if the adults can pass that one to. If you going to do a project do something your interested in because it takes a lot of time and effort.
