

## ESPC 2013 - Lethbridge (Alberta)

### Jesse Plamondon

#### The EZ B Controlled Rover 5 Robot for Detecting H2S

**Défi:** Innovation

**Catégorie:** Junior

**Région:** Northern British Columbia

**Ville:** Fort St. John, BC

**École:** Bert Bowes Jr Secondary

**Sommaire:** In this project, I designed and constructed a functioning rover-type robot that would detect H<sub>2</sub>S. Using a computer and a wireless blue-tooth adapter, I did several basic tests. Each of these tests were done six times and were five meters in length. I wanted to develop this robot so that oil/gas industry workers wouldn't be harmed when entering area with this dangerous gas.

#### Biographie

I am a grade seven student at Bert Bowes Middle School and I have lived in Fort St. John my whole life. My favourite subject is science. In science I love chemistry and robotics. Science Fair became part of my life at a very young age. I started at the age of six and have done a variety of projects-erosion, solar sluice box, gold mining, rocks and minerals. At our regional science fair, I received 3 awards for the project that I am bringing to CWSF-a robot that will carry a monitor to a well site to detect levels of H<sub>2</sub>S and hopefully save lives. I am very excited to be attending the CWSF with my brother, who also has a project, while hoping to attend again in the future. I love hunting with my brother and my dad for sheep and deer; I recently shot a deer that scored 170. I play the drums in the school band and I love playing rock music. My favourite music is dub-step, 80's rock and pop. My favourite band is Guns n Roses. At school I like to hang out with my friends as well as play sports-basketball, ping-pong, badminton, soccer, bowling.

#### Prix

#### Valeur

Prix d'excellence - Junior - Médaille d'argent Commanditaire: Sciences jeunesse Canada	300,00 \$
Bourse d'études de Western University Médaille d'argent - Bourse d'admission de 2 000 \$ Commanditaire: Université Western	2 000,00 \$
<b>Total</b>	<b>2 300,00 \$</b>
