Equine Laminitis in the Kootenays

Division: Life Sciences

Category: Junior

Region: East Kootenay

City: Creston, BC

School: Adam Robertson Elementary

Abstract: I wanted to find out if equine laminitis is more common in the Kootenays than in other areas. Information from veterinarians indicates that in the Kootenays, most laminitis cases result from horses eating too many carbohydrates. To prevent unnecessary euthanasia, I created a laminitis e-newsletter, also available in veterinary clinics.
