I Swear to Tell the Truth

Challenge: Discovery

Category: Senior

Region: Montreal

City: Montreal, QC

School: École Saint-Georges de Montréal (campus 1)

Abstract: The purpose of the experiment is to determine whether the confidence of subjects positively correlates to the accuracy of memory and to determine whether introverts or extroverts have more accurate memories.

Biography

I am in grade 11 at St. George's High School of Montreal. I am passionate about writing and I was co-founder and assistant editor of the St. George's literary journal. I recently won second prize in the 2013 Commonwealth Essay Competition. In 2012, I was President of the Student Council. I also stage-managed the grade 11 production in my Theatre Arts class. I have taken a leadership role in the environmental club at both the high school and elementary school campuses. I am currently taking a Psychology class, where I discovered my passion for understanding human behaviour. This inspired me to perform my science fair experiment. In the future, I would like to continue my research into human memory, perhaps looking at different kinds of memory. I would advise others thinking of doing a science fair project to start working early and be persistent in their research even if there are difficulties along the way.
