

## CWSF 2014 - Windsor, Ontario

## Can we Improve the Quality of H20 in 3rd World Countries

Challenge: Environment

Category: Junior

Region: City: School:

**Abstract:** Poor water quality is a worldwide problem. The purpose of my experiment

was to improve the quality and accessibility of water in 3rd world countries by designing and building a solar filter pasteurization system. I compared my filter to other commercial filters using contaminated water samples then analyzed the samples. My pasteurization system was successful eliminating

100% of bacteria from the contaminated water samples.

Awards	Value
Excellence Award - Junior - Silver Medal	\$300
Sponsor: Youth Science Canada	
Western University Scholarship	\$2 000
Silver Medallist - \$2000 Entrance Scholarship	
Sponsor: Western University	
Total	\$2 300
