

## ESPC 2014 - Windsor (Ontario)

### Micheal Last

#### Slurp!

**Défi:** Innovation

**Catégorie:** Intermédiaire

**Région:** Parkland

**Ville:** Foam Lake, SK

**École:** Foam Lake Composite High School

**Sommaire:** The floating water suction apparatus is a device constructed for the use of farmers' obtaining clean water unfettered by dirt and debris particles for sprayer usage. The device suspends the end of a water suction pump's line within the middle to top layer of water, so when the water is mixed with agricultural chemicals the most effective results are produced.

#### Biographie

Micheal Last was born on a small farm in south eastern Saskatchewan. He enjoys taking part in various school activities such as Badminton and Drama crew. In his spare time Micheal is an avid sportsman, finding great joy in outdoor activities such as hunting and ATV operation. He is currently enrolled in grade 9 at Foam Lake Composite School and is a large part of the school community. In the future he plans to attend either a form of post-secondary education or a trade school such as SIAST. Micheal is known by all his acquaintances as a funny and easy-going individual who always is able to see the bright side of life.
