

## ESPC 2005 - Vancouver (Colombie-Britannique)

### Savannah Vetter

#### Bye, Bye, Butterfly!

**Division:** Sciences de la terre et de l'environnement

**Catégorie:** Junior

**Région:** United Counties

**Ville:** Chesterville, ON

**École:** Maple Ridge Senior Public

**Sommaire:** There are many threats to the survival of the migrating Monarch butterfly. My study examines increasing environmental hazards facing Monarch butterflies along their migration route from Mexico to Ontario. As a result of my research, I am projecting that in the future the Monarch may be extirpated from Ontario.
