

ESPC 2005 - Vancouver (Colombie-Britannique)

Sean Teixeira

Power Surge 3

Division: Sciences physiques et des mathématiques

Catégorie: Intermédiaire

Région: CDLS - Province du Québec

Ville: Boisbriand, QC

École: Rosemere High School

Sommaire: My project investigated magnetic fields and factors that can influence their strength. I have researched the many sources and uses of magnetic fields as well as the possible dangers they may have. I have also conducted experiments using a homemade gauss meter to help me discover how distance and shielding affect magnetic fields.
