

CWSF 2014 - Windsor, Ontario

Kathryn Bowers, Joycelyn Moulton

The Heinous Carcinus maenas

Challenge: Environment

Category: Senior

Region: Eastern Newfoundland

City: Paradise, NL

School: Holy Spirit H.S.

Abstract: The focus of this year long study of the Carcinus maenas was to investigate the correlation between time of year and the Gonadosomatic Index Percentage of the Green Crab and to determine whether abiotic factors (air/water temperature, salinity) affect the abundance of the Green Crab. Additional investigation was conducted to determine the possibility of Green crab as potential organic compost to alleviate this existing problem.

Biographies
