

CWSF 2014 - Windsor, Ontario

Tyler Hickling, Benjamin Gilmet

Magic Maple Manipulation

Challenge: Environment

Category: Junior

Region: East Kootenay

City: Fernie, BC

School: The Fernie Academy

Abstract: We can increase the sugar concentration in maple tree sap by controlling the level of certain macro and micro nutrients the tree utilized the most in sap production. Adjusting the physical location of the tree to the most suitable for growth. By controlling these variables the sugar concentration increase would significantly affect maple sugar production.

Biographies

Tyler - My name is Tyler Hickling I live in Fernie. I am in the grade 8 class at the Fernie academy. The things I like to do in my spare time are video games mostly FPS (first person shooters), I also really like throwing knives. I am not a big fan of sports but I do play soccer and basket ball. I also was in tae kwon-do for 4 years. I like cooking but I hate reading an writing although I have been told that I am a very good writer.

Benjamin - My name is Ben Gilmet and I am an 13 year old 8th grader from the Fernie Academy, an independent school in the middle of Fernie's historical downtown. My favorite sports are volley ball, judo, and soccer. Since I live in the mountain town of Fernie, British Columbia, I also love hiking, biking and doing water sports at Lake Kooocanusa in the summer, and skiing in the winter. I have one sister named Emma, my mother's name is Colette, my father's name is Scott, and we have a Dog named Stuiie. In the future, I intend to study either geology or biology at university. The inspiration for our project was because my partner and I are both big pancake ...
