

CWSF 2015 - Fredericton, New Brunswick

Nicole Green

Pressure Cooker

Challenge: Health

Category: Intermediate

Region: Central Alberta

City: Sundre, AB

School: Sundre High School

Abstract: Hello, my name is Nicole Green and the title of my project was Pressure Cooker. The purpose of my psychology science project was to discover the influence of calm and anxious stimuli on divergent (creative) and cognitive brain function. The data I found could change the way people view cognitive and creative thinking as well as their importance in our society, business and education system.

Biography

Hi! My name is Nicole Green. I am in grade nine in Sundre, AB. Interests I have include; skiing, curling, gymnastics, badminton, volleyball, running/track, baseball, and waterskiing. I love reading/writing, music, and baking. My considerations for the future are a career in law, psychology, or forensic psychology. I am excited to continue my science fair projects and would love to take the project I'm currently working on even further. Presently, I have received a few awards over the years such as academic awards in the four core subjects, work ethic, literary legion awards, badminton, volleyball, and other athletic awards as well as having a poem I wrote published. I have been entering science fairs for the last seven years and have come up with one phrase of advice for anyone who wants to enter a project. All you have to do is try and be prepared to work hard! Dedication will get you anywhere! My time at the CWSF the last two years was fantastic and inspiring! The inspiration for my projects often comes from the world around me and the questions I have about the human mind. I am really looking forward to the CWSF :)
