Heating It Up: Optimal Temperatures for Overwintering Koi and Waterplants

Division: Biotechnologie

Catégorie: Intermédiaire

Région: Central Alberta

Ville: Innisfail, AB

École: Innisfail Junior Senior High School

Sommaire: To determine what baseline water temperature results in maximum growth of 4 aquatic plants and koi, I conducted 3 experiments where water temperature was controlled. In each successive experiment I increased the water temperature. I am conducting a fourth experiment to see if the best growth temperature can be replicated.
