#### Toxic Tampons

**Défi:** Santé

**Catégorie:** Junior

**Région:** Beaufort-Delta

**Ville:** Inuvik, NT

**École:** East Three Secondary School

**Sommaire:** The purpose of my project is to determine if the use of tampons affect women's health. My experiment aims to determine how tampon absorbency affects leaching of substances in water. My results showed that absorbency didn't affect pH levels. Tampax and Playtex had the highest (8-9).

#### Biographie

Born in Inuvik, NT Lived in the Inuvialuit Settlement Region your whole life. Grade 8. Best part about science; experiments and finding out new things. Other interests include hockey, soccer, basketball and art. This time national science fair participant.
