Liz Connon

What is Virtual Reality?

Challenge: Information

Category: Junior

Region: St. James-Assiniboia

City: Winnipeg, MB

School: Lincoln Middle School

Abstract: What is Virtual Reality? I wanted to learn what Virtual Reality is all about and what practical uses it has besides gaming. Are there drawbacks with using Virtual Reality, if so what are they? What types of Virtual Reality are there and how do they work. I also looked into the future of Virtual Reality. These are all questions I've answered in my project.

Biography

Elizabeth (Liz) Connon is an honour roll Grade 8 student at Lincoln Middle School in Winnipeg where she is involved in many activities. Liz is a founding member of the school's coding club, and a member of the student council, has been a cast member in the school musicals, (this year she played Baby Shrek in Shrek the Musical) as well as playing school sports of ultimate, cross country, and track & field. Liz has received a special "Wall of Fame" award for art, athletics, academics, and citizenship, which is a special achievement award at Lincoln. Outside of school Liz plays ringette and is currently the defending city champs for the second year in a row and enjoys reading, spending time with family and her pet rescue beagle, Parker. Liz has also attended We Day, seminars on Girls Learning Code and Raspberry Pi. I am excited about the future of Virtual Reality and how it can be used in my future studies of Interior Design. If I could give other kids advice if they are thinking about doing a project DO NOT do it last minute and have fun with it.
