William Hamilton

Personal Escape Pods : A New Emergency Breathing Apparatus

Défi: Innovation

Catégorie: Junior

Région: Northern British Columbia

Ville: Rolla, BC

École: Dawson Creek Secondary - Central Campus

Sommaire: There are many breathing apparatus that exist out on the market place, none however that have been miniaturized and incorporated into an industry standard piece of safety equipment, the hardhat. The Personal Escape Pod provides an economical solution for H₂S exposure to all types of workers in the oil and gas industry as well as to residents falling within affected areas.

Biographie

William Hamilton lives with his Mom, Dad, Sister, and little Brother on a farm in North Eastern BC. He is an avid hunter, fisherman, farmer, basketball player, ball hockey player, baseball player, and mandolin musician. He can often be found out on his quad or snowmobile with his Grandpa out on the Ducks Unlimited project surrounding his farm. William is the recipient of the Gemini Sustainability Senior Award and the Award from the Professions of Engineers and Geoscientists handed out at the 2016 Northern BC Regional Science Fair. Living among Oil and Gas industrial operations, William was inspired to come up with an idea to deal with the very real problem of H₂S exposure. William plans to further his innovation by approaching the local Oil and Gas companies for support in resources and distribution of his idea. His advice to anyone considering a science project is "Think of a question about something that inspires you or a topic that you enjoy learning about".

Prix

Valeur

Prix d'excellence - Junior - Médaille d'argent Commanditaire: Sciences jeunesse Canada	
Bourse d'études de Western University Médaille d'argent - Bourse d'admission de 2 000 \$ Commanditaire: Université Western	2 000,00 \$
Total	2 000,00 \$
