

## CWSF 2016 - Montreal, Quebec

### Brendon Matusch

#### Oscar Sorting: Sorting the Waste Stream

**Challenge:** Information

**Category:** Junior

**Region:** Sudbury

**City:** Sudbury, ON

**School:** Glad Tidings Academy

**Abstract:** Oscar Sorting is a mobile app that allows users to easily find out where waste can be directed, for example whether it is recyclable or compostable. Municipal governments will enter waste disposal information, which will synchronize with the user's app based on location. The app offers different user-friendly interfaces to find a specific item or general category. It also provides notifications and tips.

#### Biography

I am Brendon Matusch and I am in Grade 8 at Sudbury Christian Academy. I like programming, and I'm currently working on a game that I will release on the app store. I am also on the Blue Tacos First Lego League robotics team, which inspired my science fair project. We went to Waterloo for the provincials in January. When I grow up I want to be a game programmer. I also like rock climbing and I'm in grade 9 piano. Looking forward, I might continue with development on my science fair and turn it into a real app for release.
