

CWSF 2016 - Montreal, Quebec

Arman Mangat, Mohit Singh

LIGHT IT UP!

Challenge: Innovation

Category: Junior

Region: Edmonton

City: Edmonton , AB, Edmonton, AB

School: Aurora Charter School

Abstract: Our project is on making a lava lamp using materials that can be found at home: a bottle, vegetable oil, tonic water and dental tablets. It looks just like a real lava lamp without it having to be plugged in and is also cheap and safe to use.

Biographies

Arman - So I am a student from Edmonton, Alberta and I play lots of sports and are really interested in cars. Previously I have been to regionals here in my city twice but never at nationals. Me and my partners inspiration was one day when his cousin wanted a lava lamp he was not allowed to get it because it was too expensive so we wanted to make something that was cheaper and more affordable but worked just like a real lava lamp. To improve we are trying to find a way to make it last longer. Some advice would be to ask yourself how your project can help people, that's what helped us for our projects.

Mohit - Hi my name is Mohit Singh. I like to play all sports and I'm a car enthusiast. I go to Aurora Charter School and I'm also in grade eight. I got the inspiration for my project from my little cousin.
