Scott Johnson

Peat Moss

Challenge: Environment

Category: Intermediate

Region: Manitoba First Nations

City: Peguis, MB

School: Peguis Central School

Abstract: This project is to bring to light the problem of peat mining, and the effects its having locally and globally. I'm also studying the properties of peat moss and its impacts on the water.

Biography

Hi, my name is Scott Johnson I am a student at Peguis Central School and I'm 15 years old. I'm an ice hockey player and I occasionally write songs. I've been working on this project for two years now with mfnerc and my school. After high school i plan on going to the University of Manitoba. Science has made this goal much more attainable by helping me add numerous medals in the mfnerc science fair going to several camps and gaining alot of campus experience. I've decided to work in this project because of the ongoing disscussions about mining peat moss in my area.
