### Monica Zhang

#### Talking Danger

**Division:** Sciences de la vie

**Catégorie:** Junior

**Région:** Windsor

**Ville:** Leamington, ON

**École:** Queen Elizabeth P.S.

**Sommaire:** This project experimented the difference between human reaction time with a hands-free cell-phone conversation and without. The reaction times were measured using a simple audible stimulus experiment, which involves subjects catching a ruler on an audible cue. Reaction times with the cell-phone conversation were found 30% longer than ones without.
