Factors that influence the student's decision by the program B@UNAM

Challenge: International

Category: Senior

Region: Mexico

City: Villahermosa ,

School:

Abstract: The B@UNAM is an up-to-date educational alternative that is taught online at the Jean Piaget Active School. The first call for this study mode was low. Therefore, the objective of this research is to identify the internal and external factors that inhibit the choice of students to study at the B@UNAM.

Biography

My name is Roberto René Velasquez García, I am 18 years old. One of my main hobbies is to do Crossfit, I am currently preparing for a competition of the same discipline, I was a semi-professional basketball player. I have played guitar for 3 years and I really like it. With this project I've had two years of intense readings, but it's a topic that I love. One of the main pillars that motivated me to do my project was to see Why is not there a good response to technology in my school when it comes to learning? Because only 10 students chose a new system where technology is paramount and 305 gave them distrust. In the future I would like to do a curricular planning where the technology for learning is seen as the most important, since in Mexico it is estimated that in 7 years the classrooms will be much more populated than they already are, to look for and distribute different horizons In school so that many students have a good learning space. First look for a topic of your interest, know themselves and what they want what they want to achieve a future.
