Région: Frontier Schools

Ville: Little Black River, MB

École: Little Black River School

Sommaire: The theory was written if a small sustainable atmosphere could be created in a small container. the theory was proven correct. and now more tests are being made. it is proven correct.

Biographie

I am from LBRAS, a little community in the province of Manitoba. my project design was from a theory I had. this theory was put to an experiment, and proven to be successful. i like to watch STAR WARS, and that movie series inspired me to pursue science. and my mother is an inspiration to me. i hope to be a leader in my community and lead a new generation of dreamers and equality.
