

## CWSF 2006 - Saguenay, Québec

### Nathan Pollock, Quintin Beckstead

#### Final Cut

**Division:** Health Sciences

**Category:** Intermediate

**Region:** Southeast Saskatchewan

**City:** Fillmore, SK

**School:** Central School Fillmore

**Abstract:** Our project was developed so that ranchers would not have to worry about watering their animals in the morning. The design of the project is quite simple; we heated an inner pipe so that the water would not freeze and therefore animals would have access to water at anytime.
