Emytt Fetterly

How Fast is Fast Acting Pain Reliever?

Challenge: Health

Category: Junior

Region: United Counties

City: Iroquois, ON

School: Seaway District H.S.

Abstract: For my project I was interested to learn how acetaminophen, ibuprofen and naproxen dissolved in simulated stomach acid. I was keen to understand how the medications targeted the source of the pain and which type of medicine would be best for different types of pain.

Biography

Emytt Fetterly lives in Iroquois, Ontario where he is in grade eight at Seaway District High School. Emytt plays lots of sports during the different seasons. He plays hockey for his local association in the winter and enjoys baseball, soccer and volleyball during the warmer months. This is Emytt's second Canada Wide experience, last year he attended the fair in Montreal. Inspiration for his project came from a desire to learn how pain medication works to target the source.
