

## CWSF 2017 - Regina, Saskatchewan

## Biography

I am a grade 8 student attending Bruce Middle School in Winnipeg, Manitoba. I play ringette yet my true love is anime and editing. I dream of one day being a full-time Youtuber. My inspiration for my project came from my interest in alternative energy. If someone else was interested in doing this, I would say do it! Use many different forms of agrofuels and if possible, a few fossil fuels.

Category:	Junior
Region:	St. James-Assiniboia
City:	Winnipeg, MB
School:	Bruce Middle School
Abstract:	This study examines the
	see which oil burned the

stract: This study examines the efficiency of agrofuels and fossil fuels by testing to see which oil burned the longest, and increased the temperature of 100ml of water. I found out that we need to reduce our dependency on fossil fuels as an energy source; agrofuels need more land than we currently have. This is a problem because we need farms for food, not fuel.
